

I am writing in reference to 04-233 and the proposal to introduce LPFM broadcast service. I am concerned that the expansion of this existing offering would force or limit current FM translator use by radio stations such as K-LOVE. K-Love is valuable as a means of hearing clean, family-oriented music and information to listeners in my area. Many of our church members listen to K-LOVE. It has been a blessing to us all in our daily walk with Christ. If KLOVE, were to be displaced by an LPFM broadcaster, no other radio station in our area of NC provides the service area that KLOVE does. It can be heard over most parts of NC. My brother in GA is envious as no service is available in his area! We would have no other stations that provide the Christian message and the expanse of programming that K-Love offers. This station and its message is sorely needed in today's radio marketplace. I can listen to the radio in my home or car without concern of what a DJ may say with my child present. I believe all these reasons are why it is the best interest to continue this service as it currently exists.

Regards, Vicky wheeler
